Building the Wall!

It's hard to believe that there are only a couple of days left in January *and* that the beginning of our West Center Reconstruction is well underway!

This week, our contractors began building a fire protection wall to prevent fire and smoke from spreading from the construction area to other parts of the building. In the event of a fire, this wall will contain fire and smoke within the construction site for a two hour time span. The wall will surround the entry points of the suite and will remain intact until this phase of the project reaches completion.

As always, if you have questions or comments in regards to the upcoming reconstruction, please utilize the Hard Hat Update Box, located across from the chapel or email your questions to sclayton@jameslwest.org.

Thanks to each of you for your support of the Center and your continued excitement as we move forward.

Best Wishes,

Susan Farris, Executive Director
