We Are Making A Difference

Our reconstruction has been in the works for a long time. It has been the vision of many – Community Leaders, Board Members, Staff, Families and our Medical Specialists. The Amon G. Carter Foundation has made a leadership gift to our Capital Campaign and I want to share with you the words of Mr. John H. Robinson, Executive Vice President of the Amon G. Carter Foundation. His words so eloquently sum up the vision for the Center and why we are undertaking this amazing renovation.

“... the Carter Foundation appreciates the West Center’s desire to provide state-of-the-art care. We are aware that institutional nursing home models can deliver quality care but fall short of providing a good quality of life. We are pleased to participate in your reconstruction vision which emphasizes a return of freedom, independence, normality, family involvement, and meaningful activities in a setting that looks and feels like a comfortable home.”

Thank you Mr. Robinson and all of our donors who have helped to make our dream a reality!

Best Wishes,

Susan Farris, Executive Director
