Presented by Heather Macchietto, MSDA, ADC, CADDCT, CDP  
Director of the Senior Day Program at James L. West

Do you worry that  
your family  
member with  
dementia doesn't  
have any  
opportunities to  
socialize?

Does he/she sit in  
front of the TV or  
fall asleep during  
the day?

Do you, the  
hardworking  
caregiver just need  
some time to  
yourself?

Does something  
need to change?

*What if there was  
a solution?*
