April 14, 2020

To James L West Family, Staff and Friends:

In our continued commitment to keep our community well informed, we are writing to provide an update on a Coronavirus Disease (COVID-19) development. I am making you aware that a resident at the West Center has tested positive for the virus. The test was administered last Friday, and we received the result this afternoon.

The resident is not currently symptomatic, however, following the West Center's Infection Control protocol, the resident has been quarantined. The West Center's clinical leadership team is working with all staff to take appropriate action to limit the risk of spread within our community.

The West Center is working closely with the Centers for Disease Control, Centers for Medicare Services, Tarrant County Public Health, Texas Department of Health and Human Services and the Veteran's Administration to ensure that the West Center's residents and staff are treated in accordance with the most up-to-date protocols. For additional information, please visit the CDC's coronavirus disease [information page \(www.cdc.gov\)](https://www.cdc.gov).

We appreciate your support and understanding during this difficult time. We are responding diligently, and, out of an abundance of care, we are implementing every possible precaution for our residents and staff. We will continue to provide updates as they are available. For any concerns regarding this letter, please do not hesitate to contact me at 817-877-1199 or via email charding@jameslwest.org

Sincerely,

Cheryl Harding, PhD, LNFA
President/CEO
